

Joyson Safety Systems is one of the leading global developers and manufacturers of automobile occupant protection systems with a turnover of ca. 4,8 billion euros and more than 50,000 employees worldwide. We represent innovation and progress. As a reliable and skilled partner of the automobile industry, we design, develop and produce occupant protection systems and components. Our portfolio includes steering wheels, airbags and generators, safety belts, technical plastic components, electronics and sensor technology which we supply to nearly all renown vehicle manufacturers worldwide.

Our team in Arad needs support and we are seeking:

Key user Transport Management System - Logistics EMEA

Site:
Arad

What you can change — your duties

— Configure and maintain the transport management system platform and be a member of the EMEA implementation / roll-out team
— Customize system settings, workflows, reports, dashboards and user permissions based on business requirements
— Investigate and troubleshoot user-reported problems, providing timely resolutions and working together with TMS provider for solutions
— Oversee the accuracy, completeness, and integrity of data within the TMS
— Collaborate with stakeholders to define data requirements, develop key performance indicators (KPIs), and implement data-driven improvements
— Conduct training sessions and develop user documentation to educate new users on system functionality and best practices
— Stay updated with industry trends and new TMS features, sharing knowledge with users and recommending process enhancements

— Collaborate with third-party suppliers, customers and service providers to integrate their data with the TMS

— Support system audits to ensure data accuracy, integrity, and compliance with organizational standards.

Impress us – your qualifications

— University degree

— Experience as a system key-user or in a similar role is an advantage.

— Strong technical proficiency in logistics systems, preferably with experience in implementation / roll-out projects

— Familiar with data analysis

— Fluent in English

— Excellent problem-solving skills and the ability to diagnose and resolve operational issues efficiently

— Effective communication and interpersonal skills to work collaboratively with cross-functional, international teams, business partners and users

— Partial traveling required within EMEA, especially during implementation project.

What we offer — your benefits

- Company canteen
- Further training as well as in-house training
- Flexible working time
