

We are Joyson Safety Systems – A Mobility Safety Company.

Joyson Safety Systems ist einer der global führenden Entwickler und Hersteller von automobilen Insassenschutzsystemen mit einem Umsatz von ca. 5,3 Mrd. Euro und weltweit mehr als 43.800 Mitarbeiterinnen und Mitarbeitern. Wir stehen für Innovation und Fortschritt. Als zuverlässiger und kompetenter Partner der Automobilindustrie konzipieren, entwickeln und produzieren wir Insassenschutzsysteme und -komponenten. Unser Produktportfolio besteht aus Lenkrädern, Airbags und Generatoren, Sicherheitsgurten, technischen Kunststoffteilen, Elektronik und Sensorik. Damit beliefern wir weltweit nahezu alle namhaften Kraftfahrzeughersteller.

Joyson Safety Systems is one of the leading global developers and manufacturers of automobile occupant protection systems with a turnover of ca. 4,8 billion euros and more than 50,000 employees worldwide. We represent innovation and progress. As a reliable and skilled partner of the automobile industry, we design, develop and produce occupant protection systems and components. Our portfolio includes steering wheels, airbags and generators, safety belts, technical plastic components, electronics and sensor technology which we supply to nearly all renown vehicle manufacturers worldwide.

Our team in Aschaffenburg needs support and we are seeking:

Director Core Engineering GPL Steering Wheel

Site:

Aschaffenburg

What you can change — your duties

Overseeing the entire core development lifecycle, from initial design to customer communication.

Organizational, technical, and commercial responsibility for the department, ensuring projects align with our New Technology Development initiatives.

Assess global product trends, integrating technology, legislation, and customer preferences into our innovation strategy .

Develop the technical Product Roadmap and providing RFQ support to qualify relevant products for our customers.

Collaboration and support to business units and sales teams in product strategy and concept approval processes. Support for first launch (with the Application Engineering).

Lead benchmarking efforts, identifying cost and technology gaps to maintain our competitive edge.

Responsible for methodology development (DRBFM), establishment of UDS for new technologies, and leading process improvements to drive efficiency and quality.

Lead and develop a team of talented individuals, guiding them towards success and fostering a culture of innovation.
