**We are Joyson Safety Systems –
A Mobility Safety Company.**

Joyson Safety Systems is one of the leading global developers and manufacturers of automobile occupant protection systems with a turnover of ca. 4,8 billion euros and more than 50,000 employees worldwide. We represent innovation and progress. As a reliable and skilled partner of the automobile industry, we design, develop and produce occupant protection systems and components. Our portfolio includes steering wheels, airbags and generators, safety belts, technical plastic components, electronics and sensor technology which we supply to nearly all renown vehicle manufacturers worldwide.

Our team in Aschaffenburg needs support and we are seeking:

System and Tool Administrator (all genders) Global Electronics

Site:

Aschaffenburg

Explore your working world.

The System and Tool Administrator is responsible for maintenance and administration of software tools and systems that enable collaboration, development and test activities and help engineering teams to automate their processes. They will also be responsible for helping innovate new and improved solutions for existing products as well as bridge the gap between otherwise disconnected systems.

What you can change — your duties

- Administration, maintenance and monitoring of server-based tools
- User and rights management and support
- Setting up new tools and systems
- Troubleshooting (e.g. interface with tool vendor support, import backups, restore databases)
- Thoroughly develop documentation to accompany all devised work products
- Administrate digital assets/licenses
- Support the engineering team with automation tasks

Impress us - your qualifications
