We are Joyson Safety Systems – A Mobility Safety Company.

Joyson Safety Systems is one of the leading global developers and manufacturers of automobile occupant protection systems with a turnover of ca. 4,8 billion euros and more than 50,000 employees worldwide. We represent innovation and progress. As a reliable and skilled partner of the automobile industry, we design, develop and produce occupant protection systems and components. Our portfolio includes steering wheels, airbags and generators, safety belts, technical plastic components, electronics and sensor technology which we supply to nearly all renown vehicle manufacturers worldwide.

Our team in Arad needs support and we are seeking:

Project Manager Supply Chain Management, Logistics EMEA

Site:

Arad

What you can change — your duties

- Collaborate with international stakeholders to define project scope, objectives, and deliverables. Develop a comprehensive project plan, including timelines, milestones, and resource allocation
- Lead a cross-functional project team, ensuring effective communication, collaboration, and coordination. Assign tasks, provide guidance, and monitor progress to achieve project goals
- Oversee the implementation, configuration, and testing of the TMS. Ensure integration with existing systems and infrastructure, addressing any technical challenges or compatibility issues
- Develop and execute change management strategies to facilitate smooth adoption of the TMS
- Implement quality control measures to ensure the TMS meets performance, security, and reliability standards. Conduct regular testing, troubleshooting, and debugging activities to identify and resolve issues
- Identify potential risks and develop mitigation strategies to minimize project disruptions. Monitor project progress proactively address challenges, and escalate issues to senior management when necessary
- Maintain comprehensive project documentation, including project plans, status reports, meeting minutes, and other relevant documentation. Prepare regular progress reports and present updates to stakeholders and management.

Impress us - your qualifications

- University degree
 - Experience (5 years) in managing and implementing software/ supply chain projects
 - Excellent project management skills with the ability to lead cross-functional teams. Certification in project management (e.g., PMP) is a plus
 - Fluent in English
 - Strong analytical and problem-solving abilities
 - Effective communication and stakeholder management skills
 - Ability to work under pressure and meet deadlines.
