

www.joysonafety.com

We are Joyson Safety Systems – A Mobility Safety Company.

Joyson Safety Systems is one of the leading global developers and manufacturers of automobile occupant protection systems with a turnover of ca. 4,8 billion euros and more than 50,000 employees worldwide. We represent innovation and progress. As a reliable and skilled partner of the automobile industry, we design, develop and produce occupant protection systems and components. Our portfolio includes steering wheels, airbags and generators, safety belts, technical plastic components, electronics and sensor technology which we supply to nearly all renown vehicle manufacturers worldwide.

Our team in Arad needs support and we are seeking:

Analyst Supply Chain Management Logistics EMEA

Site:

Arad

What you can change — your duties

- Member of the EMEA Transport Management System implementation/ roll-out team
- Collect, analyze, and interpret supply chain data, including transports data, transportation costs, inventory levels and supplier performance metrics
- Develop and maintain supply chain reports, dashboards, and performance indicators to monitor key metrics and identify trends and areas for improvement
- Conduct cost analysis together with controlling (budget vs. actual cost ratios)
- Conduct research, benchmarking, and analysis to support the development of new supply chain strategies, initiatives, and best practices
- Continuous improvement of the supply chain processes, methods and metrics
- Facilitate workshops and collaborate with cross-functional teams to implement process improvements
- Evaluate logistics service provider performance and drive supplier development initiatives
- Monitor supplier compliance with contractual agreements, quality standards, and delivery requirements
- Collaborate with supply chain and procurement team to identify potential alternative suppliers, prepare freight tender, and support supplier selection processes.

Impress us - your qualifications

- University degree
 - Experience (3 years) as a supply chain analyst or in a similar analytical role within the supply chain domain
 - Knowledge of lean methodologies and continuous improvement principles is a plus
 - Fluent in English
 - Strong analytical and quantitative skills, with proficiency in data analysis tools and techniques
 - Excellent problem-solving and strong communication skills
 - Attention to detail and the ability to manage multiple tasks and priorities effectively
 - Willingness to travel.
